

Cloud Core Router CCR1036-8G-2S+

The device comes preinstalled with RouterOS and is ready to use. The ETH1 port has a default IP address for connecting: 192.168.88.1. The username is admin and there is no password. Please connect with your web browser to this IP address and choose Webfig to configure it. In case IP connection is not available, the Winbox tool (<http://mt.lv/winbox>) can be used to connect to the MAC address of the device.

The device doesn't have any other configuration or firewall rules applied by default, please connect to it, and set up IP addresses, users, passwords, firewall etc. Please ensure you have prevented unauthorised access from public networks by use of the firewall filters and restrictions available in the IP services menu in RouterOS.

See this page for connection and configuration guides: <http://mt.lv/help>

Powering

The device accepts powering from two redundant power supplies, each accepts 100-240 V AC power. You can use either, or both at the same time. Up to 73 W power consumption.

Extension Slots and Ports

- 8x 10/100/1000 Ethernet ports. Etherboot / Netinstall is available on port ETH8.
- 2x SFP+ cage
- USB 2.0 type A
- RJ45 console port
- microSD slot for storage expansion

Buttons and Jumpers

The **RouterBOOT reset button** has the following functions. Press the button and apply the power, then:

- Release the button when green LED starts flashing, to reset RouterOS configuration to defaults.
- Release the button when the LED turns solid green to clear all configuration and defaults.
- Release the button after LED is no longer lit (~20 seconds) to cause device to look for Netinstall servers (required for reinstalling RouterOS over network).

Regardless of the above option used, the system will load the backup RouterBOOT loader if the button is pressed before power is applied to the device. Useful for RouterBOOT debugging and recovery.

The **Mode button** is not functional by default, but can be assigned any script in the menu `/system routerboard mode-button`

LEDs

The device has four LED lights. PWR1/2 indicates which power supply is being used. FAULT indicates a problem with the cooling fans. USER can be configured in software.

Operating System Support

The device supports RouterOS software with the version number at or above what is indicated in the RouterOS menu `/system resource`. Other operating systems have not been tested.

Safety Notice

Electric shock hazard. This equipment is to be serviced by trained personnel only. This is a class A device, operating it near residential radio equipment could cause radio interference
