# RouterBOARD 450

The RB450 is a five port ethernet router.

It has five 10/100 Ethernet ports, a serial port, and two power jacks (one for use with different type of cases). The heart of this device is an Atheros CPU which makes this tiny device a quick one.

RB450 includes RouterOS - the operating system, which will turn this powerful system into a highly sophisticated router, firewall or bandwidth manager.

One small device - with all the power of RouterOS. At a very special price.
